# SANDEEP SHARMA

Lead product developer

## PROFESSIONAL SUMMARY

Dynamic Product Developer with a proven track record at Cell Point Digital, specializing in backend services and API integration. Expert in software development and strategic planning, I enhanced system performance through SQL optimization, reducing defects significantly. Adept at mentoring teams and fostering collaboration, driving innovative solutions in high-demand environments.

## WORK HISTORY

October 2025 - Current

**Cellpoint Digital - Lead Product Developer**, Pune, India (Remote)

- Designed, coded, tested, debugged and documented programs using agile development practices.
- Collaborated with cross-functional teams to deliver comprehensive solutions for clients' needs.
- Led a team of software engineers to successfully complete projects within deadlines, ensuring high-quality end products.
- Conducted thorough code reviews to maintain consistency, readability, and adherence to best practices.
- Mentored junior developers, fostering talent development and growth within the company.
- Worked collaboratively with stakeholders to resolve technical roadblocks.
- Communicated project plans, tracking details, status updates, and risk mitigation plans to cross-functional team.
- Developed robust, scalable, modular and API-centric infrastructures.
- Coordinated deployments of new software, feature updates and fixes.
- Supervised work of programmers, designers and technicians, assigned tasks and monitored performance against targets.

December 2021 - September 2025

**Cellpoint Digital - Product Developer**, Pune, India (Remote)

- Develop backend services for global airline payment platforms using XSLT, JSON, Java, Python, and SQL.
- Integrate with Amadeus/Sabre PSS, PSPs, acquirers, and digital wallets.
- Build microservices, API gateways, and reusable backend components.
- Improve system performance through SQL optimization and caching.
- Other than Development, I am responsible for code review, accessibility, performance, etc.
- Contribute to CI/CD deployments, and production troubleshooting.
- Mentoring the freshmen in the team.

- Enhanced software functionality by identifying and resolving complex technical issues.
- Developed scalable applications using agile methodologies for timely project delivery.
- Managed multiple projects simultaneously while maintaining strict deadlines and high-quality standards.
- Estimated work hours and tracked progress using Scrum methodology.
- Documented software development methodologies in technical manuals to be used by IT personnel in future projects.
- Developed next generation integration platform for internal applications.
- Mentored junior developers, fostering professional growth and enhancing team productivity.

August 2018 - December 2021

**Lexis Nexis (Vaco Binary Semantics) - System Analyst, Gurugram**

- Collaborated with cross-functional teams to develop innovative solutions for business challenges.
- Gathered requirements and performed gap analysis through design workshops with users.
- Developed Java-based backend modules with front-end UI components.
- Build XML workflows, validation engines, and editorial automation systems.
- As a core member of the team, I was responsible for new project discussions and was deeply associated with different vendors and teams for new project discussions.
- Integrated new technologies into existing systems, increasing capabilities and improving overall performance.
- Increased code quality and reduced bug rates by establishing comprehensive unit and integration testing protocols.
- Mentored junior developers, sharing knowledge and expertise to support their professional growth and development within team.
- Developed scalable and maintainable code, ensuring long-term stability of the software.
- Delivered unit-tested systems within customer-prescribed timeframes.
- Refactored legacy code bases for improved maintainability, paving the way for easier future updates.
- Conducted thorough code reviews to identify potential areas for improvement, ultimately enhancing code quality across all projects handled by the team.

February 2016 - March 2018

**Jaypee Brothers Medical Publishers (P) Ltd. - Senior Programmer, New Delhi, India**

- Provided technical guidance to junior programmers, fostering a collaborative learning environment and enhancing overall team productivity.
- Developed scalable and maintainable code, ensuring long-term stability of the software.
- Integrated new technologies into existing systems, increasing capabilities and improving overall performance.
- Developed reusable components that significantly reduced development effort on multiple projects.
- Consistently met project deadlines by effectively managing time and prioritizing tasks according to importance.
- Collaborated with management, internal and development partners regarding software application design status and project progress.

- Participated in agile development processes, including daily stand-ups, sprint planning, and retrospectives.
- Led cross-functional teams in design and launch of innovative software solutions, meeting critical market needs and user preferences.
- Developed next generation integration platform for internal applications.
- Mentored new hires through comprehensive training programs, leading to quicker onboarding times and higher employee retention rates.
- Developed user-friendly applications for increased efficiency and improved end-user experience.

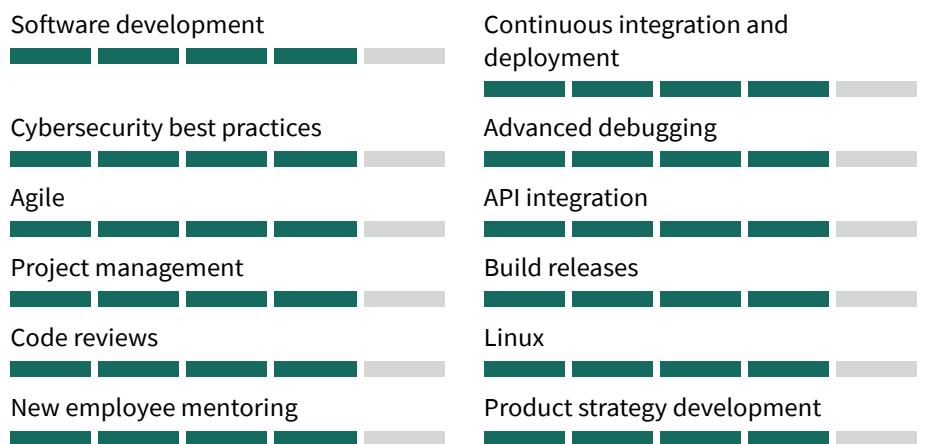

September 2012 - December 2015

**Aptara - Senior Programmer, Noida, India**

- Authored code fixes and enhancements for inclusion in future code releases and patches.
- Proactively identified potential bottlenecks in project workflows and implemented solutions to mitigate risks, ensuring smooth project completion.
- Identified areas for improvement in existing software systems, resulting in increased stability and reduced maintenance costs.
- Designed and developed computer software, web applications.
- Implemented innovative systems for data collection.
