PROFESSIONAL SUMMARY

Full-Stack Developer with over 12 years of extensive experience in backend development, payment integrations, enterprise service bus (ESB) systems, airline PSS integrations, and large-scale digital platforms. Skilled in Java, Python, SQL, and XSLT/XML for high-volume data transformation. Strong understanding of microservices, API development, DevOps practices, and CI/CD pipelines. Experienced in working with global clients and cross-functional teams. Seeking senior backend/full-stack roles in top Indian IT companies and product firms.

TECHNICAL SKILLS

Programming	Java, Spring Boot, Python, Shell Scripting
Frontend	HTML5, CSS3, JavaScript (Basics)
Backend/Integration	REST APIs, SOAP APIs, ESB, XSLT/XML
Databases	PostgreSQL, MySQL, SQL Optimization
Tools	Docker, Jenkins, Git, Postman, SoapUI, JIRA, IntelliJ
Domains	Payments, Airlines, Publishing

WORK EXPERIENCE

Full-Stack / Backend Developer — Cell Point Digital, Pune (2021 – Present)

- Develop backend services for global airline payment platforms using Java, Python, SQL, XSLT.
- Integrate with Amadeus/Sabre PSS, PSPs, acquirers, and digital wallets.
- Build microservices, API gateways, and reusable backend components.
- Improve system performance through SQL optimization and caching.
- Contribute to CI/CD deployments and production troubleshooting.

Full-Stack Developer — LexisNexis, Gurugram (2018 – 2021)

- Develop Java-based backend modules with front-end UI components.
- Build XML workflows, validation engines, and editorial automation systems.
- Improve application performance and reliability through TDD and CI/CD.

Software Developer — Aptara International, Noida (2012 – 2016)

- Develop automated XML transformation workflows for large-scale publishing.

- Implement parsing and classification modules for legal document processing.

EDUCATION

Bachelor of Commerce (B.Com), Karnataka State Open University, India

CORE STRENGTHS

- Strong debugging and API design skills
